A completed **Standard Inspection Checklist, Cover Letter and Field Report** is to be submitted to the Chief Engineer within 30 days from completion of the inspection.

Inspection Report			
Inspection ID/Docket number	ID 6784		
Inspector Name & Submit Date	Anthony Dorrough – July 1, 2016		
Chief Eng Name & Review Date	Joe Subsits, July 6, 2016		
Operator Information			
Name of Operator:	Weyerhaeuser Company - Longview	OP ID #:	22515
Name of Unit(s):	Weyerhaeuser – Ostrander		
Records Location:	3401 Industrial Way, Longview WA, 98632		
Date(s) of Last (unit) Inspection:	6/24-25/2013	Inspection Date(s):	6/1-2/2016

**Inspection Summary:**

*Historical Data*

*The Weyerhaeuser-Ostrander Pipeline is comprised of 4 (NPS-4) (~1000ft) and 12-inch diameter (NPS-12) (~9miles), API 5L, X-42 ERW steel pipe with the 12 inch diameter sections having a nominal wall thickness of 0.25 inches for below ground sections and 0.5 nominal wall thickness for above ground sections. The company operates the natural gas transmission pipeline in Cowlitz County, Washington beginning at the Williams Pipeline Interconnection slightly north east of the City of Kelso and ending at the Longview Facility. Weyerhaeuser purchased CNG's district regular station and uses it to control the gas to NorPac. The 4-inch line also can send gas to Solvay.*

*On March 1, 2010, Weyerhaeuser became part of Cosentino Consultant Corp's Total Care Program. This means that the consultant will visit site every 90 days; has review plan for each visit to ensure all requirements are met and appropriate forms filled out. Also, he will be emailed about every gas function, etc...*

*Weyerhaeuser also has the designs for automatic shutoff valves done and other measures for mitigation in response to PHMSA's ANPRM Docket 2011-0023.*

*There was [1] probable violation noted for this inspection*

**CFR 192.615 Emergency Plans**

*(b) Each operator shall:*

*(2) Train the appropriate operating personnel to assure that they are knowledgeable of the emergency procedures and verify that the training is effective.*

**Finding:**

A records review revealed that Weyerhaeuser could not provide documentation to support any emergency procedure training, or verification of the effectiveness of any emergency procedure training, i.e drills. (NOPV)

## Standard Inspection Report for Intrastate Gas Transmission Pipelines

### Form D - Records Review and Field Inspection

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
If an item is marked U, N/A, or N/C, an explanation must be included in this report.

#### GAS SYSTEM OPERATIONS

Does the operator have any transmission pipelines?	YES
Compressor stations? Use Attachment 4.	NO

#### Pipe Specifications:

Year Installed (Range)	1992	Pipe Diameters (Range)	NPS-12 / NPS-4
Material Type	X-42 ERW	Line Pipe Specification Used	API 5L
Mileage	9 Miles NPS-12 / 1000ft NPS-4	SMYS %	42.9 @ time of inspection
Supply Company	Geneva Steel (records in IMP manual)	Class Locations	Entire line is considered Class-3

#### Integrity Management Field Validation

**Important:** Per PHMSA, IMP Field Verification Form 16 (Rev 6/18/2012) shall be used by the inspector as part of this standard inspection. When completed, the inspector will upload this information into the PHMSA IM Database (IMDB) located at <http://primis.phmsa.dot.gov/gasimp/home.gim>    **Date Uploaded:** XXXXXXXXXXXX

#### PART 199 DRUG and ALCOHOL TESTING REGULATIONS and PROCEDURES

	S	U	NA	NC
<b>Subparts A - C</b>	<b>X</b>			
Drug & Alcohol Testing & Misuse Prevention Program – Use PHMSA Form #13, Rev 3/19/2010. Do not ask the company to have a drug and alcohol expert available for this portion of your inspection.				

#### PART 192 Implement Applicable Control Room Management Procedures

	S	U	NA	NC
.605(b)(12)			<b>X</b>	
Implementing the applicable control room management procedures required by 192.631. (Amdt. 192- 112, 74 FR 63310, December 3, 2009, eff. 2/1/2010). ---- ----No control room----				

#### REPORTING RECORDS

REPORTING RECORDS			S	U	N/A	N/C
1.	49 U.S.C. 60132, Subsection (b)  ADB-08-07	<b>Submission of Data to the National Pipeline Mapping System Under the Pipeline Safety Improvement Act of 2002 – January 18, 2016</b>  Updates to NPMS: Operators are required to make update submissions every 12 months if any system modifications have occurred. Go to <a href="http://www.npms.phmsa.dot.gov/submission/">http://www.npms.phmsa.dot.gov/submission/</a> to review existing data on record. Also report <u>no modifications if none have occurred since the last complete submission</u> . Include operator contact information with <u>all</u> updates. ---Update sent in Jan 2016 to NPMS via email---	X			
2.	RCW 81.88.080	Pipeline Mapping System: Has the operator provided accurate maps (or updates) of pipelines, operating over two hundred fifty pounds per square inch gauge, to specifications developed by the commission sufficient to meet the needs of first responders? ---Yes –Apr 2012---	X			
3.	191.5	Immediate Notice of certain incidents to <b>NRC (800) 424-8802</b> , or electronically at <a href="http://www.nrc.uscg.mil/nrchp.html">http://www.nrc.uscg.mil/nrchp.html</a> , and additional report if significant new information becomes available.			X	
4.	191.7	Reports (except SRCR and offshore pipeline condition reports) submitted electronically to PHMSA at <a href="http://portal.phmsa.dot.gov/pipeline">http://portal.phmsa.dot.gov/pipeline</a> unless an alternative reporting method is authorized IAW with paragraph (d) of this section.			X	
5.	191.15(a)	Do records indicate reportable <u>incidents</u> were identified and reports were submitted to DOT on Form 7100.2 (01-2002) within the required timeframe?			X	
6.	191.15(c)	Do records indicate accurate supplemental incident reports were filed and within the required timeframe?			X	
7.	191.17	Complete and submit DOT Form PHMSA F 7100-2.1 by March 15 of each calendar year for the preceding year. ( <i>NOTE: June 15, 2013 for the year 2012</i> ). ---Checked Jan 2016 submission---	X

98.		2. In the case of blasting, does the inspection include leakage surveys? (required) ---No blasting---			X	
99.	480-93-250(3)	Are locates are being made within the timeframes required by RCW 19.122? Examine record sample. ---Checked every locate on record---	X			
100.	195.507(b)	Are locating and excavating personnel properly <u>qualified</u> in accordance with the operator's Operator Qualification plan and with federal and state requirements?	X			
101.	PHMSA – State Program Evaluation Questions	Does the operator have a quality assurance program in place for monitoring the locating and marking of facilities? Do operators conduct regular field audits of the performance of locators/contractors and take action when necessary? (CGA Best Practices v. 6.0, Best Practice 4-18. Recommended only, not required)	X			
102.		Does operator including performance measures in facility locating services contracts with corresponding and meaningful incentives and penalties? ---No formal program established but no locating issues so far---	X			
103.		Do locate contractors address performance problems for persons performing locating services through mechanisms such as re-training, process change, or changes in staffing levels?	X			
104.		Does the operator periodically review the Operator Qualification plan criteria and methods used to qualify personnel to perform locates?	X			
105.		Review operator locating and excavation <u>procedures</u> for compliance with state law and regulations. ---O&M Manual - Section 5 and Appendix H---	X			
106.		Are locates are being made within the timeframes required by state law and regulations? Examine record sample.	X			
107.		Are locating and excavating personnel properly <u>qualified</u> in accordance with the operator's Operator Qualification plan and with federal and state requirements?	X			
108.	192.709	Do records indicate performance of the required study whenever the population along a pipeline increased or there was an indication that the pipe hoop stress was not commensurate with the present class location? 192.605(b)(1) (192.609(a); 192.609(b); 192.609(c); 192.609(d); 192.609(e); 192.609(f)) ---O&M Manual 3.5 of the Classification Surveys F-17 Pipeline Patrol Report---	X			
109.	192.605(a)	Confirmation or revision of MAOP. Final Rule Pub. 10/17/08, eff. 12/22/08. .611 ---No MAOP revision since 2009---			X	
110.	192.603(b)	Prompt and effective response to each type of emergency .615(a)(3) <b>Note:</b> Review operator records of previous accidents and failures including third-party damage and leak response ---No emergencies in system--			X	
111.	192.615	Actions required to be taken by a controller during an emergency in accordance with 192.631. (Amdt. 192-112, 74 FR 63310, December 3, 2009, eff. 2/1/2010). .615(a)(11) ---No Control Rooms---			X	
112.	192.603(b)	Location Specific Emergency Plan .615(b)(1)	X			
113.	192.603(b)	Emergency Procedure training, verify effectiveness of training .615(b)(2) ----Weyerhaeuser has no records of training, run tables or drills since last audit---		X		
114.	192.603(b)	Employee Emergency activity review, determine if procedures were followed. .615(b)(3) ---No emergencies in system---			X

## Standard Inspection Report for Intrastate Gas Transmission Pipelines

### Form D - Records Review and Field Inspection

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

OPERATIONS and MAINTENANCE RECORDS			S	U	N/A	N/C
115.	192.603(b)	Liaison Program with Public Officials .615(c) ---Member of the LEPC - Physically delivers EPM to officials---	X			

**Comments:**

- Q81 thru Q85 No conversion of service pipelines

192.603(b)		Public Awareness Program .616		S	U	N/A	N/C												
		Operators in existence on June 20, 2005, must have completed their written programs no later than June 20, 2006. See 192.616(a) and (j) for exceptions.																	
		API RP 1162 Baseline* Recommended Message Deliveries																	
		<table><tr><th>Stakeholder Audience (Natural Gas Transmission Line Operators)</th><th>Baseline Message Frequency (starting from effective date of Plan)</th></tr><tr><td>Residents Along Right-of-Way and Places of Congregation</td><td>2 years</td></tr><tr><td>Emergency Officials</td><td>Annual</td></tr><tr><td>Public Officials</td><td>3 years</td></tr><tr><td>Excavator and Contractors</td><td>Annual</td></tr><tr><td>One-Call Centers</td><td>As required of One-Call Center</td></tr></table>						Stakeholder Audience (Natural Gas Transmission Line Operators)	Baseline Message Frequency (starting from effective date of Plan)	Residents Along Right-of-Way and Places of Congregation	2 years	Emergency Officials	Annual	Public Officials	3 years	Excavator and Contractors	Annual	One-Call Centers	As required of One-Call Center
		Stakeholder Audience (Natural Gas Transmission Line Operators)	Baseline Message Frequency (starting from effective date of Plan)																
		Residents Along Right-of-Way and Places of Congregation	2 years																
		Emergency Officials	Annual																
Public Officials	3 years																		
Excavator and Contractors	Annual																		
One-Call Centers	As required of One-Call Center																		
* Refer to API RP 1162 for additional requirements, including general program recommendations, supplemental requirements, recordkeeping, program evaluation, etc.																			
116.	192.603(b)	The operator's program must specifically include provisions to educate the public, appropriate government organizations, and persons engaged in excavation related activities on: .616(d) (1) Use of a one-call notification system prior to excavation and other damage prevention activities; (2) Possible hazards associated with the unintended release from a gas pipeline facility (3) Physical indications of a possible release; (4) Steps to be taken for public safety on the event of a gas pipeline release; and (5) Procedures to report such an event (to the operator). ---A comprehensive review was conducted in 2012 / Done every year---	X																
117.		Documentation properly and adequately reflects implementation of operator's Public Awareness Program requirements - Stakeholder Audience identification, message type and content, delivery method and frequency, supplemental enhancements, program evaluations, etc. (i.e. contact or mailing rosters, postage receipts, return receipts, audience contact documentation, etc. for emergency responder, public officials, school superintendents, program evaluations, etc.). .616 (e) & (f)	X																
118.																			
119.																			
120.																			
121.																			
	The program conducted in English and any other languages commonly understood by a significant number of the population in the operator's area. .616(g) ---Uses Paradigm Census data---	X																	
	Do records indicate implementation of a program evaluation process implemented and continuous improvements based on the findings? 192.616(i) (192.616(h); API RP 1162, Section 2.7 Step 11; API RP 1162, Section 8) ---Review records annually---	X																	
	Analyzing accidents and failures including laboratory analysis where appropriate to determine cause and prevention of recurrence .617 Note: Including excavation damage (PHMSA area of emphasis) ---No Accidents/Failures---	X

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

<b>Comments:</b>
------------------

122.	192.517	From the review of the results of pressure tests, do the test records validate the pressure test? ---Pressure test Jul 2009---	X															
123.	.553(b)	Do records indicate the pressure uprating process was implemented per the requirements of 192.553? ---No Uprates since last audit---			X													
124.	192.709	Maximum Allowable Operating Pressure (MAOP)																
125.	.709	Note: If the operator is operating at 80% SMYS with waivers, the inspector needs to review the special conditions of the waiver.																
126.		MAOP cannot exceed the lowest of the following: .619 ---No Alternative MAOP---																
127.		Design pressure of the weakest element, .619(a)(1) ---No Alternative MAOP---																
128.	.709	The highest actual operating pressure to which the segment of line was subjected during the 5 years preceding the applicable date in the second column, unless the segment was tested in according to .619(a)(2) after the applicable date in the third column or the segment was uprated according to subpart K. Amdt 192-102 pub. 3/15/06, eff. 04/14/06. <b>For gathering line related compliance deadlines and additional gathering line requirements, refer to Part 192 including this amendment.</b> .619(a)(3)			X													
<table><tr><td>Pipeline segment</td><td>Pressure date</td><td>Test date</td></tr><tr><td>-Onshore gathering line that first became subject to this part (other than §192.612) after April 13, 2006.</td><td>March 15, 2006, or date line becomes subject to this part, whichever is later.</td><td>5 years preceding applicable date in second column.</td></tr><tr><td>Offshore gathering lines</td><td>July 1, 1976</td><td>July 1, 1971</td></tr><tr><td>All other pipelines</td><td>July 1, 1970</td><td>July 1, 1965</td></tr></table>		Pipeline segment					Pressure date	Test date	-Onshore gathering line that first became subject to this part (other than §192.612) after April 13, 2006.	March 15, 2006, or date line becomes subject to this part, whichever is later.	5 years preceding applicable date in second column.	Offshore gathering lines	July 1, 1976	July 1, 1971	All other pipelines	July 1, 1970	July 1, 1965	
Pipeline segment		Pressure date					Test date											
-Onshore gathering line that first became subject to this part (other than §192.612) after April 13, 2006.		March 15, 2006, or date line becomes subject to this part, whichever is later.					5 years preceding applicable date in second column.											
Offshore gathering lines		July 1, 1976					July 1, 1971											
All other pipelines	July 1, 1970	July 1, 1965																
129.	.709	.619(c) The requirements on pressure restrictions in this section do not apply in the following instance. An operator may operate a segment of pipeline found to be in satisfactory condition, considering its operating and maintenance history, at the highest actual operating pressure to which the segment was subjected during the 5 years preceding the applicable date in the second column of the table in paragraph (a)(3) of this section. An operator must still comply with §192.611. Amdt 192-102 pub. 3/15/06, eff. 04/14/06. <b>For gathering line related compliance deadlines and additional gathering line requirements, refer to Part 192 including this amendment.</b>			X													
130.		.620 If the pipeline is designed to the alternative MAOP standard in 192.620 does it meet the additional design requirements for: <ul style="list-style-type: none"><li>• General standards</li><li>• Fracture control</li><li>• Plate and seam quality</li><li>• Mill hydrostatic testing</li><li>• Coating</li><li>• Fittings and flanges</li><li>• Compressor stations    Final rule pub. 10/17/08, eff. 12/22/08</li></ul>																
131.	480-93-015(1)	Odorization of Gas – Concentrations adequate?	X															
132.	480-93-015(2)	Monthly Odorant Sniff Testing ---Well above minimum---	X															
133.	480-93-015(3)	Prompt action taken to investigate and remediate odorant concentrations not meeting the minimum requirements ---No low reads---	X															
134.	480-93-015(4)	Odorant Testing Equipment Calibration/Intervals (Annually or Manufacturers Recommendation) ---Checked calibration for 2013, 2014, 2015---	X

COMPRESSOR STATIONS INSPECTION (Note: Facilities may be “Grandfathered”) If not located on a platform check here and skip 192.167(c) <b>THIS PIPELINE HAS NO COMPRESSORS</b>		S	U	N/A	N/C
192.163 (c)	Main operating floor must have (at least) two (2) separate and unobstructed exits			<b>X</b>	
	Door latch must open from inside without a key			<b>X</b>	
	Doors must swing outward			<b>X</b>	
(d)	Each fence around a compressor station must have (at least) 2 gates or other facilities for emergency exit			<b>X</b>	
	Each gate located within 200 ft of any compressor plant building must open outward			<b>X</b>	
	When occupied, the door must be opened from the inside without a key			<b>X</b>	
(e)	Does the equipment and wiring within compressor stations conform to the <b>National Electric Code, ANSI/NFPA 70?</b>			<b>X</b>	
.165(a)	If applicable, are there liquid separator(s) on the intake to the compressors?			<b>X</b>	
.165(b)	Do the liquid separators have a manual means of removing liquids?			<b>X</b>	
	If slugs of liquid could be carried into the compressors, are there automatic dumps on the separators, Automatic compressor shutdown devices, or high liquid level alarms?			<b>X</b>	
.167(a)	ESD system must:				
	- Discharge blowdown gas to a safe location			<b>X</b>	
	- Block and blowdown the gas in the station			<b>X</b>	
	- Shut down gas compressing equipment, gas fires, electrical facilities in compressor building and near gas headers			<b>X</b>	
	- Maintain necessary electrical circuits for emergency lighting and circuits needed to protect equipment from damage			<b>X</b>	
	ESD system must be operable from at least two locations, each of which is:				

**Utilities and Transportation Commission**  
**Standard Inspection Report for Intrastate Gas Transmission Pipelines**  
**Form D - Records Review and Field Inspection**

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

COMPRESSOR STATIONS INSPECTION (Note: Facilities may be “Grandfathered”) If not located on a platform check here and skip 192.167(c) <b>THIS PIPELINE HAS NO COMPRESSORS</b>		S	U	N/A	N/C
.167 (b)	- Outside the gas area of the station			X	
	- Not more than 500 feet from the limits of the station			X	
	- ESD switches near emergency exits?			X	
	For stations supplying gas directly to distribution systems, is the ESD system configured so that the LDC will not be shut down if the ESD is activated?			X	
.167(c)	Are ESDs on platforms designed to actuate automatically by...				
	- For unattended compressor stations, when:				
	▪ The gas pressure equals MAOP plus 15%?			X	
	▪ An uncontrolled fire occurs on the platform?			X	
	- For compressor station in a building, when				
	▪ An uncontrolled fire occurs in the building?			X	
	▪ Gas in air reaches 50% or more of LEL in a building with a source of ignition (facility conforming to NEC Class 1, Group D is not a source of ignition)?			X	
.171(a)	Does the compressor station have adequate fire protection facilities? If fire pumps are used, they must not be affected by the ESD system.			X	
(b)	Do the compressor station prime movers (other than electrical movers) have over-speed shutdown?			X	
(c)	Do the compressor units alarm or shutdown in the event of inadequate cooling or lubrication of the unit(s)?			X	
(d)	Are the gas compressor units equipped to automatically stop fuel flow and vent the engine if the engine is stopped for any reason?			X	
(e)	Are the mufflers equipped with vents to vent any trapped gas?			X	
.173	Is each compressor station building adequately ventilated?			X	
.457	Is all buried piping cathodically protected?			X	
.481	Atmospheric corrosion control of aboveground facilities 192.481(b), (c); 192.479(a), (b), (c))			X	
.605	Does the operator have procedures for the start-up and shut-down of the station and/or compressor units? 192.605(b)(5)			X	
	Are facility maps current/up-to-date? 192.605(b)(3)			X

.616	Public Awareness Program effectiveness - Visit identified stakeholders as part of field inspection routine			X	
.605; .615(b)	Emergency Plan for the station on site?			X	
.707	Markers			X	
.199/.731	Are pressure relief/limiting devices inside a compressor station designed, installed, and inspected properly? (192.199, 192.731(a), (b), (c))			X	
.735(a), (b)	Are combustible materials in quantities exceeding normal daily usage, stored a safe distance from the compressor building?			X	
	Are aboveground oil or gasoline storage tanks protected in accordance with <b>NFPA standard No. 30</b> ?			X	
.736(a), (b)	Have adequate gas detection and alarm systems been installed in selected applicable compressor buildings?			X	

**Comments:**

**THIS PIPELINE HAS NO COMPRESSORS**

**Alternative Maximum Allowable Operating Pressure**  
**THIS PIPELINE DOES NOT USE ALTERNATIVE MAOP**

For additional guidance refer to <http://primis.phmsa.dot.gov/maop/faqs.htm>  
For Additional guidance see the FAQs at <http://primis.phmsa.dot.gov/maop/faqs.htm>

192.620	<b>Alternative MAOP Procedures and Verifications</b>		S	U	N/A	N/C
	The alternative MAOP is calculated by using different factors in the same formulas used for calculating MAOP in §192.619. In determining the alternative design pressure under §192.105 use a design factor determined in accordance with §192.111(b), (c), or (d), or, if none of these apply in accordance with:					
	Class Location	Alternative Design Factor (F)				
	1	0.80				
	2	0.67				
	3	0.56				
.620(a)	(1)	Establish alternative MAOP commensurate with class location – no class 4			X	
	(2)	MAOP cannot exceed the lowest of the following:				
		(i) Design pressure of the weakest element			X	

**Utilities and Transportation Commission**  
**Standard Inspection Report for Intrastate Gas Transmission Pipelines**  
**Form D - Records Review and Field Inspection**  
S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
If an item is marked U, N/A, or N/C, an explanation must be included in this report.
